

FRESH AND CHILLED

Fresh food machines < 4°C

FRESH FOOD < 4°C

LM SERIES

SÜ 1500 LM

The Concept

Healthy and freshly-prepared products are in greater demand from the public. The LM-series enables operators to extend their range of products on offer in this sector.

The LM's energy-efficient high-performance chilling unit means that fresh food items can be stored at a temperature below 4°C. The special air circulation of the 2T-version makes it possible to have dual temperature zones within one machine, i.e. in the lower 2 or 3 shelves the temperature is set typically at <+4°C, and in the upper shelves at between 12°C and 18°C. The machine will not vend fresh food items if the temperature rises too high.
